What makes us different:

- Most travel agents are paid based on a commission from booking, but we are paid directly from the consumers. Because of this, we provide results that are truly unique to each client, rather than based on commission scales and brand divisions.
 - Quizzes & Customer interviews make sure that we are creating trips that are perfect for each unique customer, and that take their needs and wants into consideration
- Content marketing, free resources, and added value in each step turn our customers into repeat clients

Travel after COVID-19 Pandemic

While there is no doubt that the travel industry has taken a massive hit from the corona virus, many predict that the travel industry will come back better than ever according to the <u>New York Post</u>. They suggest that there will be an increased interest in local travel, since people will be ready to travel but will want to stay relatively close to home, which supports our strategy of focusing on travel within the U.S. for the first phase of our rollout. In the same article, sources predict that travel options will be more limited, saying that the quantity and range of flights will be lessened and many routes will be cut. This suggests that travelers could need more help making arrangements, as the options are much more limited.

Travel after COVID-19 Pandemic

<u>Forbes</u> echoes these statements, claiming that travel will come back quickly, likely faster than anyone expects. In the article, experts state that travel is a highly resilient industry that always rebounds after diseases, natural disasters, and tragic events like 9/11.

Additionally, Forbes agrees that domestic travel will be the first to bounce back, and many people may opt out of flying and longer trips for shorter trips closer to home.
